

Unscripted PRD

Product Requirements Document

Product: Unscripted

Purpose: Speaking practice tool for short, structured repetition and transcript-based feedback

Target Users: People practicing public speaking, interviews, or concise verbal communication

Version: MVP

Problem

Many speaking practice tools are too broad, too long, or too friction-heavy for quick daily repetition.

Users need a compact practice loop that encourages consistency and gives immediate feedback.

Goal

Make practice feel lightweight while still producing actionable feedback after each short recording.

Scope

Prompt selection, one-minute recording, transcript generation, filler-word detection, repeated-phrase highlighting, and a clean review state for iteration.

Key Experience

Choose a prompt, record a short response, review transcript insights, and iterate quickly with minimal setup.

Success Metrics

Completion rate for practice sessions, repeat sessions per user, and reduction in filler-word density across recordings.

What I Built

- Prompt-based speaking flow centered on a one-minute response window
- Transcript feedback that surfaces filler words and repeated phrases
- Browser-based audio recording experience
- Serverless transcription pipeline using OpenAI Whisper

Skills & Tools

Product Design, UX Design, Product Thinking, AI Integration, User Flow Design, PRD Writing, Figma, UI Prototyping,

React, TypeScript, Tailwind CSS, OpenAI Whisper

Notes

This document is formatted as a PDF so the portfolio can open the PRD directly in a dedicated file instead of rendering it inline on the page.
